

Corporate Supply — One Supplier, One Invoice

Company profile · 2026-09-30

AKSCO supplies the operating consumables of companies **from one source**. We work across 19 product groups — from office and cleaning to safety equipment, electrical materials and industrial spares. We have no catalogue; our way of working is to turn the job you describe into a **priceable line list and a quote**. The point is to reduce the number of suppliers on the buying side, and with it the paperwork, accounts and follow-up they carry.

- Corporate Apparel & Promotional Items
- AV & Communication Systems
- CCTV, Alarm & Access Control
- Safety Signage, Wayfinding & Boards
- Carpet, Flooring & Acoustics
- HVAC, Air Conditioning & Filters
- Office Plants & Planters

02 How we work

- 1 Request**
A line list, a photo or a spreadsheet — whichever is easiest. If you do not know the brand, describing the job is enough.
- 2 Quote**
Most quotes on standard items go out within 1 business day. Prices exclude VAT with VAT on a separate line; lead time is stated per item.
- 3 Order**
Orders open on written confirmation. Stock and lead time were already confirmed at quotation stage — no surprises later.
- 4 Shipment**
Branch, plant or site — the delivery address can differ per line. Where partial delivery is needed, it is shown on the order.
- 5 One invoice**
However many items and however many sources, you deal with one company: one account, one invoice, one contact.

03 What is outside our scope

Writing down what we do not do prevents a misdirected request from taking up time on both sides.

- We supply materials; **installation, assembly and labour** are outside our general scope. Within İstanbul, installation can be arranged on request as a separate line in the quote.
- In corporate apparel and promotional items, **print and embroidery decoration are part of the supply**; the boundary is graphic design — you supply print-ready vector artwork.

04 Sectors we work with most

Energy & Power Plants · Manufacturing & Factories · Multi-Branch Organizations · Logistics & Warehouses · Construction Sites · Healthcare & Education. The buying rhythm differs by sector — a mobilisation date on a construction site, the cost of a stopped line in a factory, location-based distribution in a multi-branch organisation. We set the request up around that rhythm.

05 Commercial terms

Quote time	1 business day on standard items. Custom production, imports or 50+ line lists can take longer; we tell you the timeline in writing on the day we receive the request.
Pricing	Prices are quoted excluding VAT with VAT shown on a separate line. On FX-linked items the quote states its validity period and the exchange-rate basis.
Payment	Bank transfer, open (current) account, invoice on terms. Open account and deferred invoicing start after the first order; initial purchases typically begin with prepayment or short terms.
Delivery	All 81 provinces of Türkiye and international delivery. Within İstanbul by courier or our own vehicle; nationwide by cargo and freight. For export orders the Incoterm is agreed at quotation stage.
Documents	Declarations of conformity, test certificates, warranty documents and Turkish safety data sheets — which document comes with which item is written line by line in the quote. If a document cannot be obtained, we tell you in writing before quoting.
Equivalents	An equivalent is offered only if you allow it, and it is marked “equivalent” in the quote. If you need the brand exactly, it is priced that way.

06 Free resources

Templates, calculators and guides — no registration, and free to use whether or not you ever ask us for a quote

65 downloadable documents — technical specifications (Word), unit-price quotation sheets with working formulas (Excel), PPE issue records, supplier evaluation and workwear size forms. Document text is Turkish; the spreadsheets and their formulas work in any language.

aksco.com.tr/sartname/

English procurement guides — sourcing from Türkiye, payment terms, PPE intervals, category specifications —

aksco.com.tr/en/insights/

31 calculators — hygiene consumable usage, paint quantity, fire extinguisher count, lighting, pallet and container loading, stock levels. Turkish interface; they run in your browser and collect no data.
